

## **MDE Educator Effectiveness Ratings Advanced Program-School Administrators**

The Michigan Department of Education (MDE) requires school districts to provide ratings for School Building Administrator effectiveness based on annual evaluations by the school superintendent or a designee. Forty percent of the administrator evaluation must be based on student growth and assessment data.

All administrators are assigned one of four ratings: highly effective, effective, minimally effective or ineffective. The information is provided in the table below. Beginning with July 1, 2024 for the next academic year, the ratings will change to effective, developing or needing support.

For 2024-25 data, we did not have any Educator Effectiveness ratings for UM-Dearborn advanced program completers from the School Administrators program that were newly hired in Michigan and received an effectiveness rating.
