

Master of Science in Engineering Mechanical Engineering

Program Goals

To provide students with a strong background in principles of mechanical engineering and a thorough knowledge of the latest technologies in the field which extends beyond the undergraduate experience.

Learning Outcomes

1. Students will be able to demonstrate ability to use the latest technologies in the mechanical engineering field.
2. Students will be able to formulate, analyze, and solve advanced mechanical engineering problems.
3. Students will be able to apply the latest scientific and technological advancements, advanced techniques, and modern engineering tools in their professional endeavors.
